Subject: RE: Walworth Project...

Good news. Chuck didn't think we had to issue a revised FOV/NOV, since the relief is the same. I'll give them "notice" in my letter to them that we developed the Blow Chamber 4 part of the Walworth violation subsequent to the August 2010 113 Conference. I'll finesse it somehow...

Subject: Walworth Project...

Jenny and Dan-

In Paras 39-40 of our NOV/FOV, we state:

39. In 1993, USG replaced the skip hoist pulley on the cupola at its Walworth Facility.

40. In 1996, USG replaced the skip hoist pulley on Cupola No. 2 at its Red Wing Facility.

We have a problem, i.e. that we never talked about USG adding blow chamber number 4 to the Walworth Facility in tandem with the skip hoist pulley replacement.

The Blow Chamber is what adds heft to our allegations.

I think we need to issue a revised FOV/NOV for Walworth adding that project in. I'll

check with Eric.

John
